

Cross-functional product designer combining design and code to craft AI-driven, user-friendly products. **I prototype rapidly, validate with real users, and achieve measurable results—leading to increased engagement, streamlined workflows, and sleek interfaces.**

 **Founding Designer** @ Patlytics
Built an AI X patent platform to disrupt intellectual property workflows **from 0 - 1**. ⌘ 1.5+ years

 **Founding Designer** @ Patlytics
Design a way to instantly live stream to troubleshoot and instantly find solutions. ⌘ 1+ years

 **Digital Director** @ Patlytics
Manage digital operations for STEAM education and camps (& during COVID!) ⌘ 1.5 + years

 **Design & Code** @ Patlytics
Design & development for **Ubisoft Shanghai, ORM Fertility, and more**. ⌘ 10 + years

First Principles Super IC

A super IC founding/solo designer owning product discovery, rapid prototyping, and delivery, tracing business outcomes back to early problem framing, first-principles decisions, and validation loops.

Speedy iteration, Prioritize Feedback

Hypothesis-driven design at startup speed: customer discovery, quick prototypes. Insight-driven iteration with short feedback cycles across multi-stakeholder ecosystems.

Strong Visual Design Fundamentals

Information architecture, interaction design, and clean hierarchy/spacing/typography keep complexity from becoming clutter.
